

I am a long time stock holder and subscriber to XM Radio. I also am an over the road truck driver. I drive irregular route, all 48 states. The weater and road condition service provided to me by XM Radio is unique and invaluable. In fact it could be considered essential to my safety and the safety of most people of I am around. In my opinion to in anyway dissallow or deminish the dissemenation of such information to me and the motoring public would be unconcionable. Please do not allow any form of inhibiting legislation to incumber the growth and development of weather and traffic/road condition information dissemenation. Thankyou, Donald W. Johnston
